CATCH-UP PASS

Keeping BeReal Real: A Strategic Proposal for User Retention and Authentic Engagement

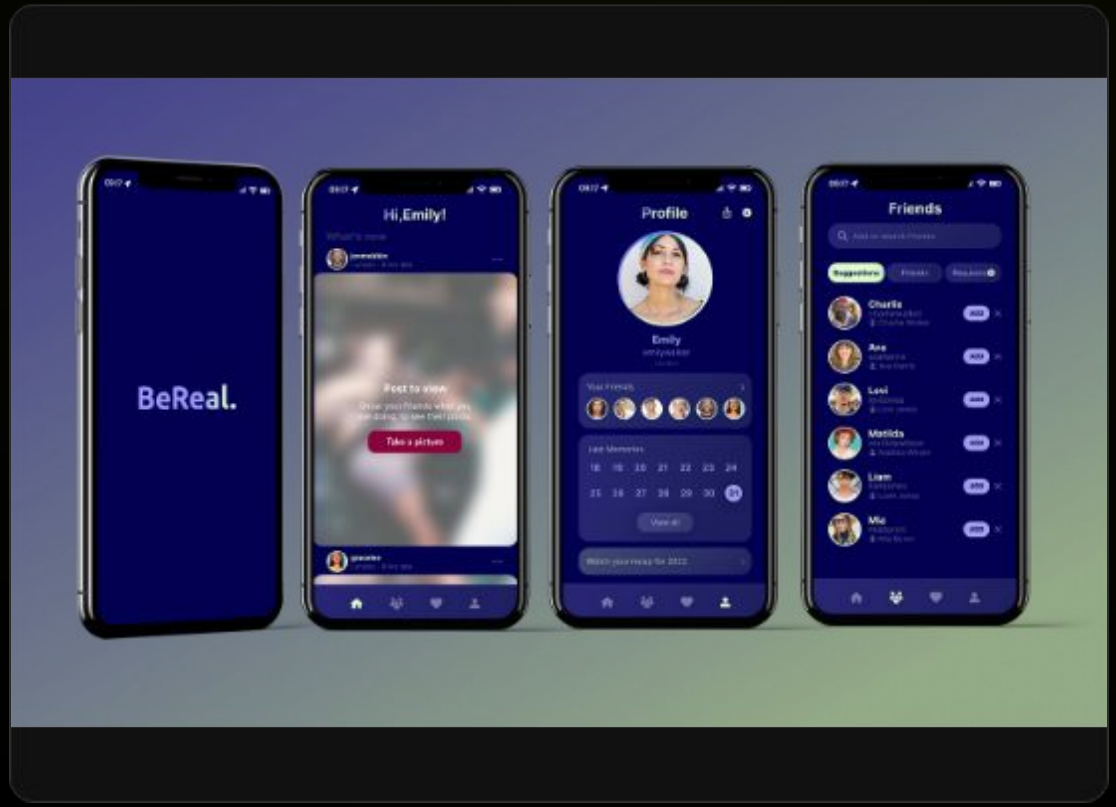

PORTFOLIO PRESENTATION

THE RETENTION FRICTION POINT

ENGAGEMENT BARRIERS

While I found that users love BeReal's core authenticity, busy daily schedules cause them to constantly miss that random notification window.

Missing that alert leads to broken streaks, acute guilt, and eventually, app abandonment. I saw firsthand how engagement drops off when life gets in the way of perfect timing.

VOICE OF THE USER

> *"I completely ignore the notification half the time because by the time I see it, I'm already in a meeting or driving."*

— Tim, Focus Group Participant

I saw a direct split between users craving relief and purists protecting spontaneity. My users want a lightweight safety net.

SOLUTION: THE CATCH-UP PASS

A STRUCTURED SAFETY NET

I designed the Catch-Up Pass as a carefully engineered feature that allows users to post a late photo using limited, earned passes.

Instead of giving my users a blank check, I provided structured flexibility with strict weekly caps to preserve core spontaneity and fit BeReal's minimalist aesthetic.

HOW IT WORKS: SEAMLESS INTERACTION

01. MISSED ALERT

When my users encounter a missed alert, they find the locked Catch-Up Pass icon waiting for them.

02. REDEEM

They tap to redeem an available pass under strict weekly limits, keeping the experience rare and valuable.

03. SHARE

They capture and share their late moment to stay connected with their friend feeds instantly.

> *"If you add a subtle indicator that says 'Posted with Catch-Up Pass', it keeps things transparent so it doesn't feel fake."*

— Hunter, Tester Feedback

IMPACT & RECOMMENDATION

VERDICT: REFINE

By offering this structured safety net, I protect daily active usage and keep friend loops alive. This prevents users from closing the app in frustration.

- **Transparency Badge:** Implement "Posted with Catch-Up Pass" indicator to protect peer trust.
- **UI Optimization:** Redesign screen three for instant clarity on remaining weekly limits.
- **Beta Launch:** Proceed to wider beta test to measure long-term MAU retention lift.

KEEPING BEREAL REAL.
